

**A Condemnation of the House of Windsor  
Regarding the Marriage of Prince Harry to Meghan Markle**

**Summani**

**XXVII Floréal, CCXXVI**

Two and a half years ago, some people were made to believe that one in fact did not need to be an individual of competence, experience, and political talent to become prime minister of the Canadian Confederation.

Today, such people are being laden down with another fraud masquerading as a social breakthrough: that an American mulatto playgirl is worthy of the title of “Princess” in the British Royal Family.

The failures on the part of many have led us to this.

The author is dismayed at the lack of fortitude in the Commonwealth’s monarchist leagues in their failure to take any sort of stand against this transformation of the Royal Family life into some sort of American pop culture show. It is evident now that these monarchist leagues cannot be counted on to defend Britain’s royal culture.

Although he ought not to place too great an amount of blame on her, owing to her age, the author cannot withhold a condemnation of Her Majesty herself – for she consented the approval of the marriage of her grandson to Meghan Markle. That said, as a historian, the author knows that posterity’s judgment of a politician’s or monarch’s contributions are condensed in ways that would seem cruel and unfair. But the facts will be the facts: the Second Elizabethan Era will be known to history as one in which British Civilisation declined at an extremely rapid rate – far more rapidly than did Roman Civilisation. True, the decline began under her grandfather and not her, but nothing was done under her to stem the decline of her house, her kingdom, and her dominions around the world. Scandals of infidelity among her family members have added to the sorry state of the House of Windsor, and now the deeply morganatic marriage of Prince Harry has demonstrated that the damage is beyond repair. A culture of indifference, fatalism, passiveness, and surrender to the seemingly unstoppable tides of cultural Marxism has seized the House of Windsor by the throat.

The author knows that there is no such thing in the political world as “an unstoppable tide”. All movements have headmasters – controllers whose goal is to make their enemies feel that there is no point in resisting.

It is not too late to repair the royal culture of the United Kingdom. But it will take some surgery – and that surgery requires the amputation of the current royal house.

Summani Documents therefore calls for the House of Windsor to be relieved of its duties as the Royal Family of the United Kingdom, of Canada, and of the Commonwealth. Summani Documents also nominates the House of Württemberg, displaced from its throne by the Weimar Republic, as the new Royal Family, and that the eldest living issue of Carl, Duke of Württemberg, shall be placed on the British throne.

**FURCHTLOS UND TREW**
